EXAMINER	
DELGADO, MICHAEL A	
ART UNIT	**PAPER NUMBER**
2144	

DATE MAILED: 07/26/2004

4

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/736,432	JOUNG, JUN SOUK	
	Examiner	Art Unit	
	Michael S. A. Delgado	2144	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *03 March 2003*.

2a)☐ This action is **FINAL**. 2b)☒ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *1-15* is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) *1-15* is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☒ The drawing(s) filed on *03 March 2003* is/are: a)☒ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12)☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a)☒ All b)☐ Some * c)☐ None of:

1.☒ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 3.
4) ☐ Interview Summary (PTO-413) Paper No(s)/Mail Date. _____ .
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No 6,401,200 by Nishiike et al.

In claim 1, Nishiike teaches about a method for down-loading data from an upper processor "Controller" to a plurality of lower processors "DSPs" of a mobile communications switching system in a process of resetting the processors, the method comprising (Col 1, lines 5-15) (Fig 3):

requesting an information download from the lower processors to the upper processor (Col 1, lines 5-15); (Boot process initiated by DSPs)

accessing a memory of the upper processor "master ROM" containing the requested information down-load (Col 4, lines 20-30);

determining whether the accessed information has an error (Col 4, lines 20-30); (ROM has built in parity error checking).

grouping the lower processors with a representative address "Common boot address" (Col 2, lines 55-67) (Fig 4); and

creating the accessed information in an IPC format (Communication between processors – Controller and DSPs) and transferring the IPC format information by using the group representative address (Col 2, lines 55-67).

In claim 2, Nishiike teaches about a method of claim 1, wherein the resetting of the processors includes an initial loading and a re-loading (Col 5, lines 30-40).

In claim 3, Nishiike teaches about a method of claim 1, wherein the group representative address includes all the lower processors (Fig 4)

In claim 4, Nishiike teaches about a method of claim 1, wherein the grouping the lower processors comprises grouping the plurality of lower processors using the group representative address "Common boot address" (Fig 4).

In claim 5, Nishiike teaches about a method of claim 1, wherein the grouping the lower processors comprises grouping at least one additional lower processor (Fig 4).

In claim 6, Nishiike teaches about a method of claim 1, wherein group information is used to determine the group representative address, and wherein the group information comprises a node address (NA), a BHIU address (BA), a cinu address (CA), and a slot address (SA) (Col 1, lines 25-30). (These addresses are used in mobile communication).

In claim 7, Nishiike teaches about a method of claim 6, wherein the group representative address is set by using the CA and the SA among the group information (Col 1, lines 25-30).

In claim 8, Nishiike teaches about a method of claim 7, wherein grouping of the group representative address is responsive to one of only the CA among the group information, only the SA among the group information and both the CA and the SA among the group information (Col 1, lines 25-30).

In claim 9, Nishiike teaches about a method of claim 8,wherein the IPC format information is concurrently transferred to all the lower processors using the group representative address (Fig 4).

In claim 10, Nishiike teaches about a method for downloading data from a first processor "Controller" to a plurality of second processors "DSPs" while resetting the processors, the method comprising (Col 1, lines 5-15) (Fig 3):

transmitting a request for an information download from the plurality of second processors to the first processor (Col 1, lines 5-15); (Boot process initiated by DSPs)

accessing once a memory of the first processor for the requested information;

grouping the second processors using a prescribed processor address (Col 4, lines 20-30); and

assembling the accessed information in a prescribed format and transferring the assembled requested information to at least two second processors using a group representative address (Col 2, lines 55-67)

In claim 11, Nishiike teaches about a method of claim 10, wherein the grouping of the plurality of lower processors is performed using the group representative address (Fig 4).

In claim 12, Nishiike teaches about a method of claim 10, wherein the prescribed processor address is an IPC processor address that includes a node address (NA), a BHIU address (BA), a cinu address (CA), and a slot address (SA) (Col 1, lines 25-30). (These addresses are used in mobile communication).

In claim 13, Nishiike teaches about a method of claim 12, wherein the group representative address is set by using the CA and the SA among the IPC processor address (Col 1, lines 25-30).

In claim 14, Nishiike teaches about a method of claim 13, wherein grouping of the group representative address is responsive to one of the CA, the SA and both the CA and the SA(Col 1, lines 25-30).

In claim 15, Nishiike teaches about a method of claim 10, wherein the method further comprises determining whether the accessed requested information has an error (Col 4, lines 20-30). (ROM has built in parity error checking).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 6,212,557 by Oran teaches about a method and apparatus for synchronizing upgrades in distributed network data processing systems.

US Patent 6,021,442 by Ramanan et al, teaches about a method and apparatus for partitioning an interconnection medium in a partitioned multiprocessor computer system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael S. A. Delgado whose telephone number is 703-305-8057. The examiner can normally be reached on 7.30 AM - 5.30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, WILLIAM A CUCHLINSKI JR can be reached on (703)308-3873. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
